TOWNSHIP 18 SOUTH, RANGE 9 EAST, SALT LAKE MERIDIAN, UTAH

The survey was executed in accordance with the specifications set forth in the Manual of Surveying Instructions, 1973, and the Special Instructions for Group No. 950, dated July 8, 2002.

The direction of the lines were determined by mean geodetic inverse bet. cors. Global Positioning System (GPS) utilizing Real-time kinematic (RTK) was used throughout the survey. Cadastral Measurement Management (CMM) was utilized during the course of the survey.

Preliminary to the resurvey, the lines of the original survey were retraced and a diligent search was made for any evidence of the original field note record. The retracement data were thoroughly verified and only the true line notes are given herein.

The geographic position of the cor. of secs. 10, 11, 14 and 15, T. 18 S., R. 9 E., as determined by a tie to the National Geodetic Survey Control Station "BUCKHORN", utilizing GPS, using RTK techniques, is as follows:

Latitude: 39°15'53.483" N. Longitude: 110°53'19.628" W.
N.A.D. 1983 (1994)

The geographic position of National Geodetic Survey Control Station "BUCKHORN" is as follows:
